SUMMARY

I am a Full Stack Web Developer with a food industry background, ready to use my effective communication skills and problem-solving abilities to create simple and friendly applications.

PROJECTS

Workout Buddies

A simple application that allows the user to create an account, and then create workouts of their own that can be shared freely amongst fellow users of the application.

Role: In this project I had the role of team-lead. I created to-do lists for the front-end and back-end teams and monitored their progress, lending a hand when necessary. I personally created the database, worked with account activation, authentication, and routes, as well as rendering data to the handlebars templates created by the front-end team.

GitHub: https://github.com/Tuzosdaniel12/Workout-Buddies
Deployed Application: https://workout-buddies.herokuapp.com/
Tools Used: JavaScript, CSS, HTML, Bootstrap, Sequelize, Node.js, express, handlebars

Movie Trailer MatchUp

This application creates a hub of sorts where the user can access a variety of movies associated with their search query and have instant access to the most relevant movie trailer associated with each.

Role: In this project I spent most of my time teaching and leading the front-end team to implement a pleasant design using Bulma as our CSS wireframe. I also helped the back-end team connect with their API. I focused the remainder of my energy upon streamlining the application and tracking down edge cases.

GitHub: https://github.com/mfrisch87/MovieTrailerMatchUp
Deployed Application: https://github.com/mfrisch87/MovieTrailerMatchUp
Tools Used: JavaScript, CSS, Bulma, Youtube API, OMDB API

PROGRAMMING LANGUAGES

- JavaScript
- HTML
- CSS

TECHNICAL SKILLS

- JQuery
- Handlebars
- Node.js
- Express
- Git
- MySQL
- Sequelize
- Bootstrap
- Bulma
- MongoDB
- Firebase
- React

WORK EXPERIENCE

Bartender, Server / Cactus Restaurant / Bellevue, WA (2015 - Present)

My responsibilities involve deep-cleaning and organizing the bar for efficiency and future success. It is a very team-oriented environment where everyone, whether server or kitchen staff, is encouraged to ask for help when needed and help others whenever possible.

Bartender, Server / Tavern Hall / Bellevue, WA (2015-2020)

During my time at the Tavern Hall I was expected and encouraged to be constantly improving my knowledge of, and ability to mix, new cocktail recipes. The challenge of improvising a fun and unique cocktail upon client request is one of the most rewarding aspects of bartending. I also had the occasional responsibility on training new bartenders, which I always enjoyed.

Bartender, Server / Columbia Tower Club/ Seattle, WA (2011-2016)

At the Columbia Tower Club I helped create a new cocktail menu and was in charge of opening and closing the bar. I was also allowed to create novel syrups to bring a new perspective to our cocktails. Establishing effective communication with the bar manager kept the bar flowing without any shortage of ingredients. Being knowledgeable in all front-of-house positions allowed me to serve as a wildcard employee, able to change potions on the fly to keep the restaurant running smoothly.

EDUCATION

Full Stack Web Development Bootcamp Certification: A 24-week intensive program offered by the University of Washington that focuses on establishing a strong programming foundation and gaining a broad range of technical programming skills.

GED: Seattle Central Community College, Seattle, WA
